Proposal Outline for SW594 Individual Research

Students should develop a research plan with their faculty supervisor of this course using the following outline (1 or 2 double-spaced pages). The student and the faculty member should both sign the proposed research plan and submit it to the PhD office. The research plan will be filed in the student folder.

1. Identify the major research question
2. Identify the method to be used to answer the question
3. Identify the major types of data analysis that likely to be used
4. Identify the products that will be produced.
